### HELPFUL TIPS AS YOU PREPARE:

- Do not pack your luggage in front of your pet
- Be calm and confident leading up to and at drop-off. Keeping this experience familiar and short is in their best interest so as to limit anxiety. Your pet will miss you as much as you miss them but if you are comfortable and consistent with their routine, they will have a positive transition
- Arrange for an earlier drop-off so your pet has time to acclimate and exercise before bedtime
